

FORESIGHT SUSTAINABILITY WEEK

In partnership with the Goodwood Estate

Monday 27 September – Friday 1 October 2021

Join us for a week of live streamed breakfast debates focusing on delivering a net-zero, resilient future as we accelerate towards 2050.

As we near the UN Climate Change Conference (COP26), there is an urgent need for dialogue and collective action.

To help tackle the core issues around achieving carbon neutrality, we have gathered some of the leading voices from business climate adaptation, agriculture and investment.

This week is a unique digital series of live streamed breakfast debates. Experts will discuss the challenges and opportunities that arise as the private sector mobilises behind the global sustainability agenda.

Investing for a smarter future, it takes Foresight.

Established in 1984, Foresight is a listed infrastructure and private equity investment manager with c.£7.2 billion of assets under management. Our business was founded upon the constant pursuit of innovation and we aim to provide a sustainable legacy for future generations.

As Sustainability Partner to the [Goodwood Estate](#), Foresight and Goodwood are driving the conversation around responsible business and stewardship.
