

How to whitelist your favourite email addresses (e.g. editor@cambridgenetwork.co.uk)

In the preview pane for an opened email message, right click the sender's From name under the email's subject line and select "Add to Outlook Contacts" from the drop-down menu:

How to whitelist ANY email from your favourite domain (e.g. xx@CambridgeNetwork.co.uk)

In email Inbox, right click the email message and from the menu select "Junk" then "Never Block Sender's Domain"

Note: Other email clients may have slightly different wording

For more information, here's an article on [email whitelisting](#) to help with why this is important both for marketers and email recipients.
