

Articulate 360 - Introduction

1 Day Course

Overview

Articulate 360 is a toolkit containing a number of apps to help you design eLearning. This course is dedicated to all things Articulate 360. Delegates will learn how to build complete modules using Rise, as well as supplementing these modules with additional content using the Articulate 360 tools - Peek and Replay. You'll learn which tool to use and when, and walk away with a deeper understanding of the Articulate suite of tools.

Audience

eLearning content designers, instructional designers, trainers and marketing professionals.

Course Objectives

At the end of the course, you will have developed your own Articulate-based eLearning course and have learnt/be able to do:

- ✓ Design an eLearning interface suited to your subject matter and target audience
- ✓ Use Rise to create mobile optimised courses from your browser
- ✓ Add Text, Audio, Images and Multimedia content
- ✓ Design meaningful Surveys/Quiz interactions and review questions
- ✓ Use Peek for screen recording
- ✓ Use Replay to manage recordings
- ✓ Publish your course to a variety of media

Prerequisites

No knowledge is assumed, but it helps to have a working knowledge PowerPoint.
