

Power BI Desktop Intermediate

1 Day Course

Overview

This Power BI course is aimed at more experienced Power BI users. The course delves into more complex data relationships, the use of some advanced DAX formulas and queries, working from different data sources, time intelligence, and charts. Delegates will learn how to customise the data model through visualisations and dashboard tiles.

Audience

Business/Data analysts or anyone who needs to interpret and communicate large quantities of information clearly.

Course Objectives

At the end of this course, delegates will be able to:

- Use different data sources
- Use Visualisations and Charts to convey data efficiently
- Use more advanced DAX and Time intelligence functions
- Use query parameters
- Design and deploy Dashboards

Prerequisites

Delegates must have good Power BI and basic DAX knowledge or have attended our Power BI Introduction course.
